Profile

Full-Stack Developer with experience building and maintaining enterprise web applications, REST APIs, data-processing services, and automation solutions. Skilled in React, TypeScript, C#, .NET, SQL, and UiPath across frontend and backend development. Experienced in enhancing existing systems, improving performance and validation, and delivering maintainable solutions for real business workflows.

Experience

Citco International Support Services Limited - Philippine ROHQ

August 2023 - Present

Position: Developer

Project 4:

- Built and maintained a .NET console application that processes structured business and reference data for downstream enterprise workflows.
- Implemented rule-based validation and cross-reference checks, generating exception reports for incomplete, invalid, or unmatched records.
- Transformed validated records into standardized import-ready files with clear ingestion, validation, reporting, and transformation stages.

Project 5:

- Built and enhanced a UiPath Apps request-management application with dashboard views and configurable data-entry forms.
- Implemented queue-based asynchronous processing and supporting automations using UiPath Orchestrator, Data Fabric, and managed storage.
- Generated standardized downstream output files and automated routing through SMTP based on request configuration.

Position: IT Junior Developer

Project 1:

- Optimized API calls, reducing report load time by **66-83%** from approximately 6 minutes to 1-2 minutes.
- Delivered new features and resolved minor and critical defects, improving application stability and user experience.
- Optimized SQL stored procedures and supported DEV/QA deployments for the Web API and Web UI.

Project 2:

- Contributed to the initial setup of the frontend, backend, and database for a new internal tool using ReactJS, ASP.NET Core, and SQL.
- Built role-based user management and an operational dashboard for daily FX-rate data and application status.
- Implemented backend error detection and re-import logic to trace and automatically reprocess failed or incorrect data imports.

Project 3:

- Contributed to maintenance and feature development of an existing full-stack application with dashboards, reporting, account-reference management, configurable rules/templates, and CRUD/database workflows.
- Enhanced a scheduled background service that converts MT940 bank statements into CAMT.053 using configurable line- and tag-based transformation rules.
- Added stricter validation and parsing checks to improve conversion reliability and reduce invalid or malformed output.

Personal Projects

Ohayo Brew Loyalty System - Full-Stack Application

- Developed a full-stack loyalty platform with customer, staff, and administrator experiences, including secure authentication, QR-based loyalty operations, rewards, and role-based workflows.
- Built the React/TypeScript frontend and ASP.NET Core APIs with PostgreSQL, Entity Framework Core, Docker, transactional email, and automated backend testing.

Gerb's Electrical Trading and Services - Production Website

- Developed and deployed a responsive React/TypeScript business website with multi-brand product catalogs, reusable product-detail routes, and mobile-friendly navigation.
- Integrated quotation inquiries, SEO metadata, structured data, and production deployment on Vercel under a custom domain.

Skills

Frontend: React, TypeScript, JavaScript, Material UI, Vite, Zustand, HTML, CSS

Backend: C#, .NET, ASP.NET Core, REST APIs, Entity Framework Core, Serilog

Data: SQL, SQL Server, PostgreSQL

Automation: UiPath, UiPath Apps, UiPath Orchestrator, RPA

Tools: Git, GitHub, Docker, Postman, Jira, Visual Studio, Visual Studio Code

Education

Bachelor of Science in Electrical Engineering - University of Santo Tomas, Manila, Philippines - 2023

Trainings

UiPath: Automation Developer Associate Training (v2024.10) - Learning plan issued January 28, 2026

Meta: Programming with JavaScript (July 2023) and React Basics (July 2023)

LinkedIn Learning: .NET Fundamentals (September 2023), C# (October 2023), Programming Foundations: Object-Oriented Design (October 2023)
